

Oaks announces New Smart Lock at CES!

Oaks team announces new smart lock and Open API at CES to transform IoT Market

THOUSAND OAKS, CA, UNITED STATES, January 8, 2019 /EINPresswire.com/ -- The [Oaks](#) team is excited to announce that we will be at this years [CES 2019](#)! Hosted annually in Las Vegas, the Consumer Electronics Show is where some of the most cutting edge companies present their latest and greatest technology offerings. The Oaks team will be attending CES to demonstrate our wide range of IoT devices including our lineup of smart locks, hubs and other IoT tech in the pipeline!

What is OAKS? Located in Thousand Oaks, California, Oaks is an IoT company focusing on developing the best consumer-facing smart home devices the industry offers.

The Oaks story started with an acorn of an idea... "Why can't anyone design intuitive smart home devices that are beautiful, easy to use and have a friendly developer environment?"

After years of working in the "Internet of Things" space, The Oaks team understands how confusing smart home technology can be. With hundreds of protocols, tens of thousands of devices, voice control, "Walled Garden" ecosystems and a lot of confusion, why couldn't a company provide an easy to use, beautiful, and robust IoT product lineup? Well, Oaks is doing just that.

At CES 2019 Oaks will be launching the new Oaks smart lock 2! Users can use the Oaks App, unique codes or custom Key-Fobs to allow homeowners, renters, and guests to access doors and common areas.

Why can't anyone design intuitive smart home devices that are beautiful, easy to use and have a friendly developer environment?"

Oaks IoT Team

The Oaks 2 lock allows homeowners to implement a beautiful keyless entry lock at an affordable price point. Say goodbye to keys and live with Oaks! Features of the Oaks Smart Lock 2 include...
