

Tom Parke to lead a workshop on the new FDA draft guidance on Adaptive designs during the 11th Annual Conference

SMi Group are delighted to have industry expert Tom Parke to lead the post-conference workshop during Adaptive Designs in Clinical Trials 2019.

LONDON, UNITED KINGDOM, January 15, 2019 /EINPresswire.com/ -- The [11th Annual Adaptive Designs in Clinical Trials](#) conference, taking place in London on the 1st – 2nd April 2019, is a significant change from the 2010 version of the draft guidance. This workshop will look at the changes and what it means for submitting proposals for adaptive trials to the FDA.

It is highly beneficial for interested parties of this year's event to attend the half day post-conference workshop on the 3rd April. SMi is delighted to host this workshop led by Tom Parke, Director of Software Solutions, Berry Consulting.

The workshop will cover key topics:

How to submit adaptive designs to regulators, what the contents of the documents should be, what simulation details need to be submitted, what problems to expect and how to submit simulation results and software.

More information on this workshop can be found on the [event brochure and website](#) on the associated events section, please go to <http://www.adaptivedesigns.co.uk/einpress>

The workshop will provide the opportunity to learn and discuss the topic in a more intimate environment. Attend this workshop if you would like to understand how the new guidance

SMi's Adaptive Designs in Clinical Trials Conference 2019

reflects changes at the FDA, how to justify the use of an adaptive design to the FDA, how to document an adaptive design, how to organise, perform, and report the clinical trial simulations necessary to support an adaptive design and how to report the results of an adaptive design.

There is another option to attend a post-conference workshop taking place on the 3rd April about 'Design and analysis of clinical trials evaluating novel digital technologies' led by Alex Sverdlov, Director of Biostatistics, Novartis and Yevgen Ryznik, PhD, Uppsala University.
