

New Report Suggests Small Business Owners Are Behind The Curve On Digital Marketing

LONDON, GREATER LONDON, UK, January 17, 2019 /EINPresswire.com/ --

While 71% of small business owners reportedly plan to use social media content to attract new customers, and 33% plan to increase their budget for social media management, [Web Content, Search Portals, SEO Services And Social Media, Opportunities And Strategies To 2022](#), a report from [The Business Research Company](#) shows that they may be focusing on the wrong channel. According to a digital marketing survey conducted in the USA by Clutch in 2018, 47% of small businesses spend approximately \$10,000 on digital marketing as it is cost effective. Small business owners feel that website content, social media, and email marketing are the top three digital marketing channels. 75% are planning to use Facebook, 37.6% plan to include Instagram, 35.1% plan to use Twitter, 22.8% plan to use LinkedIn, and 21.4% plan to use YouTube. In contrast, however, according to a 2018 survey conducted by the Pew Research Center involving adults, young adults (18 to 24 years) and teenagers, Snapchat, Instagram and YouTube dominated the social media landscape in the USA, leaving Facebook behind. The leading social networks in the USA are YouTube, Facebook and Instagram, with penetration rates of 73%, 72% and 39% respectively.

According to the Pew Research Center's survey, 95% of teenagers have complete access to smartphones and 45% are online constantly. Moreover, Facebook is not a dominant platform among teenagers as 72% of them use Instagram, while 69% use Snapchat and only 51% of teenagers use Facebook.

Going by these figures, small business owners might have to rethink their strategies and focus on the social media platforms that are more popular among teenagers and young adults. The top five competitors in the global [web content, search portals, SEO services and social media](#) market made up almost half of the total market in 2017. Google LLC was the largest competitor, followed by Facebook Inc, Baidu Inc., Netflix, and Tencent.

Despite being the second largest competitor in the global web content, search portals, SEO services and social media market, Facebook has been left behind in terms of social media consumption by users.

[Web Content, Search Portals, SEO Services And Social Media, Opportunities And Strategies To 2022](#) is one of a series of new reports from The Business Research Company that identify opportunities and explain strategies, provide a market overview, analyse and forecast market size and growth, market trends, drivers, restraints, and leading competitors' revenues, profiles
