Inoapps joins forces with Rapid4Cloud

Inoapps joins forces with Rapid4Cloud to drastically reduce timescales, improve quality and lower the risks of implementing Oracle Cloud.

LONDON / HOUSTON , UK /US, January 17, 2019 /EINPresswire.com/ -- Leading Oracle Platinum Partner Inoapps (www.inoapps.com) has signed a global Strategic Alliance with Rapid4Cloud (www.rapid4cloud.com). Under the terms of the agreement Rapid4Cloud's unique Oracle Cloud toolset will be integrated with Inoapps' widely acclaimed In2Cloud implementation methodology. Inoapps will also use its extensive Cloud knowledge, experience, and technical skills to help Rapid4Cloud accelerate and improve their product.

Phil Martin of Rapid4Cloud (Left) & Phil Burgess of Inoapps Celebrate Strategic Alliance

Rapid4Cloud's automated technology delivers real benefits throughout the entire delivery lifecycle. Rapid automated configuration for new Cloud customers reduces consulting time and critically client effort. Additionally, its toolset can be utilised to automate the Cloud journey from existing Oracle Application Platforms, including the migration of data and application configuration.

Commenting on the Strategic Alliance, Phil Burgess Inoapps' UK MD noted, "Having successfully used the toolset at several projects, it was clear we needed to embed this into our delivery. We have customers presenting the benefits at Oracle OpenWorld London and will also showcase this in Dubai and Singapore."

Andy Bird CEO of Inoapps added, "We have already developed an excellent relationship with Rapid4Cloud and are highly impressed by the ability of their rapid implementation toolsets. By combining this revolutionary automation technology suite with our proven methodologies, we can offer our customers unrivalled implementation speeds and flexibility. This means they can

now begin reaping the benefits of their investment far more rapidly than they could before. We can now truly deliver on the promise of the Cloud.

"We will be working extremely closely together, with Rapid4Cloud, identifying areas where our feedback can help establish them as the global leader in automating the implementation, management and maintenance of Oracle Cloud applications. As such, this global Strategic Alliance supports our aim to invest in innovative technologies that transform customer experience. It also reinforces our reputation as the partner of choice for multinational companies seeking to move to the Cloud."

Philip Martin CEO of Rapid4Cloud welcomed Andy Bird's comments, adding; "Inoapps has a well-deserved reputation for customer excellence. We are delighted that they have chosen to include Rapd4Cloud in their In2Cloud implementation methodology. We are also impressed by their global standing and believe they have a great deal to offer us. We are looking forward to working extremely closely across a global audience."

Inoapps is showcasing its In2Cloud methodology at OpenWorld events in London, Dubai and Singapore.

About Inoapps

Inoapps is an Oracle Platinum Partner and Oracle's current Cloud First Partner of the Year 2018/19. We focus on delivering cutting edge Oracle On-Premises and Cloud solutions for our clients, which deliver them operational excellence and maximise the benefits of their Oracle investment. We do this by supporting our customers through their Oracle journey with advisory consultancy, transformational implementations, enterprise change management, hosting services, training, first class managed support services and our own products.

Our pedigree in Oracle applications spans over 12 years, and through rapid global growth, our presence now extends across North America, Europe, the Middle East, Australia and Asia, with implementations in 30+ countries.

At Oracle OpenWorld 2017 we were named Most Innovative Managed Service Partner for our continuous improvement of the Oracle customer experience. Inoapps goal is always to deliver the right solution to the problem at hand. We do this via the use of Oracle on-premises and Cloud solutions, covering everything from E-Business Suite, PeopleSoft & JDE through to SaaS, PaaS and IaaS (ERP, HCM, SCM, EPM, BI, APEX).

With 5 years of Oracle Cloud focus, we have built a dedicated Products division. This enables us

to provide complete Oracle Cloud solutions for many industries where we have unrivalled implementation experience including Oil & Gas, Engineering and Construction, Public Sector, Manufacturing, Higher Education, Professional Services and Financial Services.
