

New website www.Hotels.Tube gives travellers unbiased and realistic review of hotels.

www.Hotels.Tube offers true presentations of accommodation options from different hotels from around the world for users to make WISE Reservations.

NEW DELHI, DELHI, INDIA, January 18, 2019 /EINPresswire.com/ -- Hotels.Tube has officially launched its website www.Hotels.Tube allowing users to create and post videos of hotels and accommodation from around the world. The brand-new start-up company was established to give travellers a more realistic and unbiased look at hotels. On the website www.Hotels.Tube videos can be posted created by travellers, bloggers, and from their own in-house producers. Each video allows the [hotel](#) to be showcased in a more natural way than through many of the promotional clips and advertisements released to the public.

[Travel](#) websites like Trip Advisor and Expedia receive millions of visitors per month. Yet, many of the reviews for hotels are biased due to bad experiences or one traveller's unhappiness with an aspect of their accommodation. One review can harm a hotel's revenue as more people read and base their accommodation plans on the experience. Hotels.Tube aims to prevent these types of reviews from occurring. Travellers and bloggers have the chance to showcase a hotel through their video. Viewers can see exactly what it would be like to stay at a particular venue as they see all the major aspects of it.

One of the most unique features of Hotels.Tube videos and reviews, is it allows users to give their honest opinion of the venues. Viewers are able to hear honest and realistic reviews about prices, room size, amenities, and much more. The great information makes planning a trip easier as real travellers give viewers important advice.

In 2018, a serial fraudster was found guilty of selling fake reviews to hospitality businesses. Fake hotel reviews are a major concern for both hotel companies and travellers. Hotels.Tube hopes their videos and reviews can eliminate untrue information allowing both travellers and hotels to benefit.

Hotels.Tube allows users to create and post their own videos. It also has an in-house team of editors and producers who can create videos. The start-up has outlined its desire to work hand-in-hand with hotels to create realistic presentations of their accommodation. Hotels.Tube believes the more transparent a hotel or company can be about its rooms and experiences, the more successful it can be. Hotels can hire the start-up company and allow it access to their branch to showcase a true sense of the venue.
