

CompanionLink Releases Google Calendar Sync for Windows Store Outlook

Windows Store Outlook is now pre-installed on most Laptops. CompanionLink for Google can synchronize Outlook with Google Calendar, Contacts and Tasks.

PORTLAND, OR, US, January 22, 2019 /EINPresswire.com/ -- CompanionLink Software has released an update to [CompanionLink for Google](#) to provide full compatibility to the Windows Store version of Office 365 Outlook. Prior releases and most competing products require the ISO installation, which is the traditional API for Outlook Objects.

"[Windows Store Outlook](#) is part of Microsoft's push to Universal Windows Platform Apps," says Wayland Bruns, CTO for CompanionLink. "This version of Office comes pre-installed on most laptops. Our team has re-engineered our Google Sync and Outlook Sync products to support Microsoft's UWP endeavor."

CompanionLink features a step-by-step guide to [convert the Windows Store version of Microsoft Office to the ISO version](#). This conversion requires Office to be uninstalled, and requires a download file and license key from the laptop vendor. From now on, CompanionLink customers will run smoothly with the UWP version, and customers no longer need to replace Office and Outlook on their new laptop.

CompanionLink for Google synchronizes Outlook Calendar, Contacts and Tasks to Google. It supports calendar colors and push updates for faster sync. The cost is \$49.95 for a perpetual license that allows you to install on up to three
