

# Industrial Nitrogen 2019 Global Market Size, Market Share, Status, SWOT Analysis and Forecast to 2025

---

PUNE, MAHRASHTRA, INDIA, February 6, 2019 /EINPresswire.com/ -- Global Industrial Nitrogen Market

Nitrogen is a 'permanent gas' that is colourless, tasteless, odourless, and non-combustible. It constitutes 78% of air by volume, is very inert in the free-state and incapable of supporting life. In its liquid state it is extremely cold at -196 °C. One volume of liquid nitrogen gives approximately 700 volumes of gas at ambient conditions.

In 2017, Asia Pacific accounted for the largest share of the global industrial nitrogen market and is projected to grow at the highest rate during the forecast period. The increase in the demand for industrial nitrogen can largely be attributed to the rising population of the region with high disposable incomes and growing industrialization in the region.
