PUNE, MAHARASHTRA, INDIA, February 6, 2019 /EINPresswire.com/ --

[Aerospace & Defense industry](#) consists of establishments involved in developing prototypes and manufacturing or assembling of complete aircrafts, aircraft parts, radars, weapons and ground vehicles for civilian and military purpose. These companies also provide maintenance, repair and overhauling services to the aircrafts and other after sales services.

Use of passive radars are gaining traction in the market due to its advantages across wide range of defense and civil applications and cost effectiveness. Passive radars use the existing electromagnetic signals from the atmosphere to support imaging and tracking capabilities, whereas the regular/active radar sends out electromagnetic signals to the target and receives reflected signals from the target. Passive radars use ambient radio signals for tracking and surveillance and are less expensive to operate.

In 2018, the global Aerospace & Defense market size was xx million US\$ and it is expected to reach xx million US\$ by the end of 2025, with a CAGR of xx% during 2019-2025.
