Companies especially those belonging to industrial, manufacturing, and construction sectors have realized that it is better to take precautions and prevent any lethal damage to any of their workers. Many regulatory bodies have laid guidelines to promote the safety and health of workforce. For instance, Occupational Safety and Health Administration (OSHA) in the U.S. is responsible for formulating standards that are aimed to encourage a safe and healthy environment for employees. OSHA has set requirements for the use of PPE such as 29 CFR 1910.135 (Head protection); 29 CFR 1910.137 (Electrical protective equipment); 29 CFR 1910.136 (Foot protection), and 29 CFR 1910.138 (Hand protection), among others. OSHA together with few other agencies such as National Institute for Occupational Safety and Health (NIOSH), and National Fire Protection Association (NFPA), among others standardizes guidelines for work environment.

PPE finds application in various industries including oil & gas, petrochemicals, transportation, food & beverages, power & energy, construction, and healthcare, among others. Among these industries, construction industry is experiencing highest application, and is among one of the largest end-use industry that is driving the market. The industry is flourishing in Asia Pacific region, primarily due to the presence of developing nations that are heavily investing in their infrastructural facilities.

Key Findings from the study suggest that the largest share of the market in 2017 was of the North American region. Moreover, the market is segmented on the basis of products and end use. On the basis of product, the market can be segmented into eye protection, hand protection, head protection, hearing protection, fall protection, protective clothing, professional footwear, and respiratory protection, among other. Professional footwear is anticipated to foresee highest

growth, owing to their wide range of application across various industries. These footwears are largely utilized for protection from sharp edge objects, and helps avoid direct contact from any hazardous chemicals.
