WiseGuyRerports.com Presents "Global Document Management and Storage Services Market 2018 by Manufacturers, Countries, Type and Application, Forecast to 2023" New Document to its Studies Database. The Report Contain 128 Pages With Detailed Analysis.

## Description

The document management and storage services industry helps firms streamline their document processing requirements – they offer convenient and secure storage options for hard copy records, convert paper records to electronic ones, and provide document shredding services. Enlisting the services of document management service providers helps businesses benefit from the resultant reduction in costs, improvement in sales efficiency (as information processing is made easy), greater security, and better compliance.

## Scope of the Report:

This report studies the Document Management and Storage Services market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Document Management and Storage Services market by product type and applications/end industries.

About 65% of the market was managed by in-house document solutions in developing countries. This can be attributed mainly to buyers' apprehensions regarding the loss of control over the document management process. Additionally, storage in offsite facilities might result in increased security risks for buyers.

For instance, in December 2012, a Fortune 100 financial company was fined US\$750,000 for failing to maintain records for millions of e-mails. This strict regulatory environment is serving as a growth driver for this market as organizations are focusing on reducing compliance and storage costs to remain competitive in the market and avoid penalties/fines.
