Report Details:

This report provides in depth study of “Spices Market” using SWOT analysis i.e. Strength, Weakness, Opportunities and Threat to the organization. The Spices Market report also provides an in-depth survey of key players in the market which is based on the various objectives of an organization such as profiling, the product outline, the quantity of production, required raw material, and the financial health of the organization.

A spice is a dried seed, fruit, root, bark, or vegetable substance primarily used for flavoring, coloring or preserving food. Because they tend to have strong flavors and are used in small quantities, spices tend to add few calories to food. Many spices, however, can contribute significant portions of micronutrients to the diet.

A spice may have other uses, including medicinal, religious ritual, cosmetics or perfume production, or as a vegetable.

A spice may be available in several forms: fresh, whole dried, or pre-ground dried. Generally, spices are dried. A whole dried spice has the longest shelf life, so it can be purchased and stored in larger amounts, making it cheaper on a per-serving basis. Some spices are not always available either fresh or whole, for example turmeric, and often must be purchased in ground form. Small seeds, such as fennel and mustard seeds, are often used both whole and in powder form.

In this report, it includes the dried plant product used primarily for seasoning purposes or medicine effectiveness etc.

ASTA defines spices as “any dried plant product used primarily for seasoning purposes”. Included are tropical aromatics (pepper, cinnamon, cloves, etc.), leafy herbs (basil, oregano, marjoram, etc.), spice seeds (sesame, poppy, mustard, etc.) and dehydrated vegetables (onions, garlic, etc.). Blends such as curry, chili powders, poultry seasoning, etc. are part of the spice shelf, too.
