## Executive Summary

Global Machine Translation Market to reach USD 1483 million by 2025.

Global Machine Translation Market valued approximately USD 435 million in 2016 is anticipated to grow with a healthy growth rate of more than 14.60 % over the forecast period 2017-2025. The major factors driving the Machine Translation market are the growing volume of big data, the need for cost effective translation, and increasing online content. Moreover, globalization is raising the demand for location based content across various industry verticals such as electronics, travel, e-commerce and hospitality. However, the availability of free translation tools may limit the adoption of translation machine. The industry is witnessing a transition from human translators to Machine Translation as is an efficient tool to deliver similar linguistic conversion with significantly lower time and cost. Advances in Machine Translation technology and new implementation approaches including crowdsourcing are expected to reduce the cost of Machine translation while improving its efficiency.
