

NIOSH Now Targets Mold in Buildings

WILLOWBROOK, ILLINOIS, UNITED STATES, February 7, 2019 /EINPresswire.com/ -- NIOSH has released a Dampness and Mold Assessment Tool for general buildings and schools to assist managers in identifying and assessing areas of dampness in buildings. NIOSH states "implementing regular visual inspections for dampness can help to identify trouble areas before they become major problems and help to prioritize maintenance and repair." "The Dampness and Mold Assessment Tools provide an inexpensive mechanism to investigate, record and compare conditions over time." Hygieneering, Inc's indoor air quality testing and mold inspection service provide facilities with a proactive approach to maintain healthy and comfortable indoor air quality. Taking a proactive approach on your indoor air quality issues can accomplish minimizing costs associated with future complaints regarding indoor air quality, address current complaints or concerns by providing scientific data documenting the quality of air, prevent a "sick building syndrome" from occurring, maximize productivity of workers and promote a healthful work environment.

Hygieneering, Inc. is Women's Business Enterprise National Council (WBENC) Certified!
