

# ITFirms lists Top Actors in React Native App Development '19

*Taking it higher, induction of React Native into app development companies will not take a secondary role lying down!*

NEW YORK, UNITED STATES, February 11, 2019 /EINPresswire.com/ -- Although both native and cross-platform app development have a similar layout and logic, the user-interface components of each platform differ and it requires developing the applications in two different languages. This process requires a completely new skill set each time.

Resolving big-time challenges with HTML5 Hybrid Mobile apps like limited UI experience, non-sharing of code, slow performance, dependency on web-browser's speed, dependency on the framework or plug-in support, React Native has promised a solution that has enabled developers to use the same tools and techniques across different platforms.

React Native gives the same speed to the applications as native applications. Features like 'Hot Reloading' makes it spring up among its counterparts. With big companies like Netflix, Instagram, Facebook, Walmart etc. relying on React Native, the tendency of things with ITFirms will be to celebrate the ones who are upright and performing, not the ones who are infuriated by the dearth of their incompetence. Here is a roll call of [top react native app development companies](#) 2019 by ITFirms:

1. eTatvaSoft
2. Konstant Infosolutions
3. Prismetric
4. Nimblechapps
5. Algoworks

6. Ready4S
7. Hidden Brains
8. SynapseIndia
9. Apptunix
10. SemiDot InfoTech
