Wiseguyreports.Com Adds “Starch – Global Market Growth, Opportunities, Analysis Of Top Key Players And Forecast To 2025” To Its Research Database.

## Description:

Starch is a carbohydrate consisting of a large number of glucose units joined by glycosidic bonds. This polysaccharide is produced by most green plants as an energy store. It is the most common carbohydrate in human diets and is contained in large amounts in staple foods such as potatoes, wheat, maize (corn), rice, and cassava.

Global giant manufactures mainly distributed in U.S., China and E.U. The manufacturers in U.S. have a long history and unshakable status in this field. Manufacturers such as ADM and Cargill have relative higher level of product's quality. As to France, Roquette has become as a global leader. In Germany, GEA leads the technology development. Most of Chinese manufactures locate in Shandong and Jilin province.

Currently, approximately more than 80% of global corn starch is concentrated in United States and China, in which America is the world's largest producer of corn starch, and able to maintain low price.

China corn starch output growth is declining, mainly because of China's corn starch capacity has serious excess production. Most of the Chinese companies operating rate hovering at 60 percent, some small and medium enterprises operating rate is less than 50%.

The global Starch market is valued at 35800 million US\$ in 2018 and will reach 48300 million US\$ by the end of 2025, growing at a CAGR of 3.8% during 2019-2025.
