

B&H WORLDWIDE EXPANDS IN MIAMI, USA

MIAMI, USA, February 22, 2019 /EINPresswire.com/ -- Increased, ongoing customer demand and forecasted business growth in the US, has led B&H Worldwide, the award winning aerospace logistics provider, to move its US-east coast operation to a larger facility at Miami, Florida. Both its specialist warehouse and offices have been moved to the new location which will enable it to triple available warehouse capacity for customers.

The new facility features climate controlled and non-climate controlled areas to cater for the specialist aerospace shipments the company handles. In addition to more overall space, the new Miami site also means larger structural parts can now be held within the building alongside long and short-term storage items requiring climate-controlled facilities. In combination with its FirstTrac software solution the company is able to offer comprehensive warehouse and inventory solutions, including seamless integration to other ERP and inventory systems.

“

The new operation's close proximity to the airport cargo area will enable us to meet both existing and new customers' needs.”

Stuart Allen (Group CEO)

“Miami is not only one of the largest MRO markets in the US but also the world and one of the fastest growing,” states B&H Worldwide CEO, Stuart Allen. “In addition, it represents one of the most connected gateways with its multiple flight connections and is thus the ideal location to have an expanded operation in order to cater for ongoing customer demand. The new operation's close proximity to the airport cargo area will enable us to meet both existing and new customers' needs”.
