The risk assessment and disaster management solution segment is expected to grow at the highest CAGR during the forecast period. Digital map solutions support the mapping and tracking of natural disasters, such as hurricanes, earthquakes, and volcano eruptions, which may have an immediate impact on the human health as well as a secondary impact, causing further death and suffering. Additionally, they assist in tracking environmental emergencies, such as forest fires caused by humans, and technological and industrial accidents usually involving the production, use, or transportation of hazardous materials. Digital map solutions for risk assessment provide flood maps and information, tools to better assess the risks from flooding, and precautionary planning information to help communities take actions to reduce flood risks.
