

Indoor Air Quality in US Market 2019 Global Opportunity Analysis And Industry Forecasts To 2023

Indoor Air Quality -Market Demand, Growth, Opportunities and Analysis Of Top Key Player Forecast To 2023

PUNE, MAHARASHTRA, INDIA, March 5, 2019 /EINPresswire.com/ -- [Indoor Air Quality Industry](#)

Description

Wiseguyreports.Com Adds "Indoor Air Quality -Market Demand, Growth, Opportunities and Analysis Of Top Key Player Forecast To 2023" To Its Research Database

This report is confined to covering IAQ issues at residential homes, commercial buildings and light industrial properties, schools and hospitals. It does not discuss IAQ issues relevant to heavy industry and manufacturing environments, nor does it cover IAQ issues, practices, equipment and regulations concerning confined spaces or aircraft. However, it does discuss the equipment and services that are most relevant to private homes, office buildings and retail establishments, schools and health care facilities in great detail. The equipment covered includes air cleaners, HVAC equipment, HVAC replacement filters and IAQ instrumentation. Environmental services, such as consulting and remediation and recovery, are also specifically noted.

The report first covers trends and information related to the overall IAQ market. It then discusses the equipment subcategory of the industry and breaks that down into sections on each type of equipment. Next, it covers the consulting and testing industry subcategory and then the environmental services industry subcategory. Under each subcategory, technologies, trends, market value and growth are discussed. From there, the report covers the end-use markets including residential dwellings, commercial buildings, schools and hospitals. Each setting is discussed in detail, including specific contaminants, problems and solutions, as well as the types of equipment and services appropriate to each.

Report Includes:

- An overview of the U.S. market for indoor air quality.
- Analyses of global market trends with data from 2015, estimates for 2016, and projections of compound annual growth rates (CAGRs) through 2021.

- A look at recent trends in the indoor air quality (IAQ) industry and their impact on various market segments.
- Information about indoor air contaminants that are of the highest concern in end-use markets, including mold and other biological contaminants, allergens, airborne pollutants, and radon.
- In-depth analysis of the settings and end-use markets of IAQ, including homes, commercial buildings, schools and hospitals, as well as the reasons why IAQ is of great concern in each of these settings.
- Profiles of leading companies in the industry.
