## [Solar Thermal Market 2019](#)

Solar thermal energy concentrates sun rays on a heat transfer fluid to produce steam. This steam is then converted into mechanical energy in a turbine that turns a generator to produce electricity. It is different from solar photovoltaic (PV) systems, wherein the electricity is produced directly from solar radiation using solar panels.

In terms of geographic regions, APAC accounted for the major share in the market in 2017. The economic development and the need for energy in the emerging countries such as China and India will propel the growth of the solar thermal electricity market during the forecast period.

The heat generation segment accounted for the major share of the market during 2017. According to our research report, the growing demand for heat generation will significantly drive the growth of the solar thermal energy market during the forecast period.

The global Solar Thermal market is valued at xx million US\$ in 2018 is expected to reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2019-2025.
