

# New VIZpin Case Study: On Solid Ground RV & Boat Storage Gives Customers Quicker, More Convenient Access with VIZpin

LANCASTEER, PA, UNITED STATES, March 6, 2019 /EINPresswire.com/ -- [Access control](#) solution provider [VIZpin](#) recently released a case study, "[On Solid Ground](#) RV & Boat Storage Gives Customers Quicker, More Convenient Access with VIZpin". The study focuses on how VIZpin's smartphone-based access solution improves convenience and relieves traffic congestion the facility's customers face when using a traditional keypad solution.

According to the study, On Solid Grounds' customers have the unique challenge of having to exit RVs or carefully maneuver vehicles pulling large boats and trailers to access the keypad that operates the motorized gate to the facility. In the study, Co-owner Thomas Martucci details how VIZpin met the criteria the owners sought in an access solution: easy for customers to use; the ability for owners to know who enters the facility and when; and the flexibility to work parallel to an existing keypad solution.

When asked about the benefits On Solid Ground has realized with VIZpin, Martucci says, "VIZpin is a great product and exactly what we needed – simple to use, which we knew would be attractive to our customers. In addition, anyone can give their keycode away, but no one gives their smartphone away, so we know that when Joe's VIZpin key was used, it was Joe in the facility."

“

VIZpin is a great product and exactly what we needed – simple to use, which we knew would be attractive to our customers”

*Thomas Martucci*
