The entire industry will form oligopoly trends, industry environment will become better and better. Due to the huge cost of capital in LED Chip industry, the investor will be very difficult to entrance this industry unless it has government subsidies. In today’s LED chip industry, a part of small scale company will be faced with the risk of collapse due to price war. Price war led to the price reduction rate far exceeds the reduction rate of cost. So parts of the company will be collapse if they have not enough funds. Every coin has two sides , the other part of stronger firms will be survived. In that case, the oligopoly situation will be formed .Meanwhile , the survived firms will control the market price. The LED chip industry will be keeping in a good stable state in the near future
