PUNE, MAHARASHTRA, INDIA, March 8, 2019 /EINPresswire.com/ -- Summary:

A new market study, titled "Discover [Global Spot Welding Robots Market](#) Upcoming Trends, Growth Drivers and Challenges" has been featured on WiseGuyReports.

## Introduction

### Global Spot Welding Robots Market

Robotic spot welding, a type of resistance welding, is the most common welding application found in the manufacturing field. Spot welding robots are used to carry the spot welding operation in end-user industries. These robots deploy copper alloys for transmitting electric current to the welding point and contain a spot welding gun at the terminal point of the robot wrist, which is in place instead of an end-effector.

The automotive industry accounted for the major share of the spot welding robots market during 2017. Our industry research experts have predicted that this end-user segment will continue to account for the maximum share of this spot welding machine market during the forecast period as well.

This market study estimates that in terms of geographic regions, APAC will be the major revenue contributor to the spot welding robots market throughout the forecast period.
