Wiseguyreports.Com adds “Digital Inspection Market –Market Demand, Growth, Opportunities, Analysis of Top Key Players and Forecast to 2025” To Its Research Database.

## Report Details:

This report provides in depth study of “Digital Inspection Market” using SWOT analysis i.e. Strength, Weakness, Opportunities and Threat to the organization. The Digital Inspection Market report also provides an in-depth survey of key players in the market which is based on the various objectives of an organization such as profiling, the product outline, the quantity of production, required raw material, and the financial health of the organization.

The digital inspection market has been segmented on the basis of dimension into 2D and 3D. 3D accounted for a larger share of the market in 2017 and is expected to grow at a higher CAGR during the forecast period. 3D helps overcome the limitations of 2D techniques and offers added advantages to manufacturers to inspect beyond 2 planes of a product and volumetric height, allowing for 100% inspection and detection of defects in a product.

The digital inspection market has been segmented on the basis of technology into machine vision, metrology, and NDT. Metrology accounted for the largest share of the market in 2017. The demand for metrology is driven by the rising need for accurate inspection of 3D data used for modeling and analysis of 3D models, growing focus on quality control, inability of traditional measurement devices to address several manufacturing issues, and growing automation and in-line metrology. The market for NDT is expected to grow at the highest CAGR between 2018 and 2023. The growth of this market can be attributed to the continuous advancements in electronics, and automation and robotics, and the increasing adoption of IoT solutions.

In 2018, the global Digital Inspection market size was xx million US\$ and it is expected to reach xx million US\$ by the end of 2025, with a CAGR of 6.9% during 2019-2025.
