

Research Deliver Insight into Denmark Telecoms, Mobile and Broadband Market 2019-2023

WiseGuyReports.com "Denmark - Telecoms, Mobile and Broadband - Statistics and Analyses" report has been added to its Research Database.

PUNE, MAHARASTRA, INDIA, March 12, 2019 /EINPresswire.com/ -- WiseGuyReports.com "[Denmark](#) - Telecoms, Mobile and Broadband - Statistics and Analyses" report has been added to its Research Database.

Scope of the Report:

Denmark's telecom market competition impacting on revenue

Denmark's competitive telecom market continues to benefit from having one of the highest broadband penetration rates globally, as well as comprehensive LTE coverage. This has stimulated a range of IP-enabled applications which has encouraged revenue growth in the mobile and internet segments, though market competition has meant that overall sector growth has fallen in recent years.

Excellent cable and DSL infrastructure have been supported by a progressive regulatory regime which has encouraged operator access to both copper and fibre networks. Fibre networks have a fast-growing footprint, while a number of community and metropolitan schemes have supplemented TDC's own commitments to build out fibre nationally. The development of VDSL and fibre, as well as LTE-A and 5G in the mobile market, is crucial to meeting the government's objective for all premises to have access to a 100Mb/s service by 2020.

The mobile market continues to show steady growth despite the country having one of the highest mobile penetration rates in Europe. Operators have started trials of 5G services while commercial services will be greatly supported from the beginning of 2020 when spectrum in a range of bands which will become available.
