[Groundnut Oil Market 2019](#)

Groundnut oil, also known as groundnut oil or arachis oil, is a mild-tasting vegetable oil derived from groundnuts. The oil is available with a strong groundnut flavor and aroma, analogous to sesame oil.

Groundnut oil is an edible vegetable oil that is derived from groundnuts. groundnuts are legumes and are native to Latin America and several others tropical regions. groundnut or groundnut oil is a well-established product with a historically high use in several Asian foods and cuisines. It is used either as a base for cooking (cooking oil) or to enhance the flavor of the underlying food.

The functional properties offered by groundnut oil are an important factor driving the market. groundnut oil is particularly suited for deep-frying purposes as it does not absorb the flavor of the underlying food products. It is also a relatively healthy oil due to a low percentage of saturated fats, trans-fats, and cholesterol. These factors are important in the context of the increasing health awareness among consumers. The nutty flavor offered by groundnut oil is also an important factor that influences groundnut oils to be used as a dressing and flavoring agent.
