Description

Time tracking software enables workers to either passively or manually track the time spent on projects, tasks, and other deliverables. This software is used by employees and employers in many industries and helps small- and mid-sized business (SMB) owners stay organized and up-to-date in managing their employees' time. Time tracking software increases productivity in employees because it allows for accountability, helping to discover which activities or events cause time wasting, and keeps all time data in one location. Ideally, time tracking software can tweak discrepancies in workflows to fix what is and isn't working to increase profits and automate companies' payroll and billing operations. Many time tracking software solutions work with workforce management software, encompassing human resources, payroll, and talent management tools. Time tracking software can be integrated either directly into time clock hardware or deployed in the cloud.
