Introduction

Global Home Healthcare Market

Home health care is a diversified industry which includes home nursing care, infusion services, companion care, and others. Home healthcare is particularly referred as home medical care. Home health care generally involves helping geriatric people to recover from an illness or injury and live independently for as long as possible. Home health care includes occupational & physical therapy, speech therapy, and skilled nursing. It may involve helping older adults with activities of daily living, like bathing, dressing, and eating. It can also include assistance with cooking, cleaning, other housekeeping, and monitoring one's medication routine.

The global home healthcare market is mainly driven by increasing geriatric population, rising healthcare costs and technological advancements in healthcare devices. With increasing health awareness among people, increase in a number of people diagnosed with chronic diseases such as diabetes cardiac disorders and respiratory diseases, the demand for home healthcare market is expected to grow in the near future. The population of geriatric people is growing rapidly across the world. Geriatric population is more vulnerable to chronic diseases such as diabetes. This, in turn, is expected to fuel the growth of home healthcare market. However, changing reimbursement policies and limited insurance coverage may pose a challenge to the home healthcare market growth in the near future. Rapid job growth in home healthcare services is expected open alluring avenues for the market growth over the next few years.

The Americas is expected to witness a growth in the global home healthcare market due to the increasing adoption of long-term home care services and growing awareness about healthcare. The growth of the aging population will further propel the growth prospects for the market for the next four years. This in turn, will drive the purchase volume of crutches, canes, and wheelchairs by aging population.
