A new market study, titled "Discover [Global Home Theater Projector Market](#) Upcoming Trends, Growth Drivers and Challenges" has been featured on WiseGuyReports.

## Introduction

### Global Home Theater Projector Market

Most of today's home theater projectors offer Full HD, which is 1080p resolution. Granted, those TVs can wage war with sunlight in a way that many projectors cannot achieve, and they offer more in terms of features, such as Internet apps and digital tuners. Still, if you are looking to bring the cinema home or rally around a huge screen for the next big game or movie night, there is no better solution than a projector.

The growing preference toward a theater-like movie or gaming experience among consumers has led to the increase in adoption of home theater projectors. Also, these projectors are portable and more economical than products like flat-screen TVs. One of the recent developments in the market is the growing demand for ultra-short throw projectors with high brightness. Also, consumers are opting for energy-efficient and eco-friendly projectors. Recently, Casio launched a new range of eco-friendly LampFree projectors that consume over 50% less electricity than regular projectors. Vendors have also introduced smart projectors, which automatically shifts to an idle mode when not in use, thereby saving electricity.
