Soy protein isolate is the soy protein with the highest content of protein. It is made from defatted soy meal by removing most of the fats and carbohydrates, yielding a product with 90 percent protein. Therefore, soy protein isolate has a very neutral flavor compared to other soy products. Because most of the carbohydrates are removed, the intake of soy protein isolate does not cause flatulence. Pure soy protein isolate is difficult to find in stores and is mainly used by the food industry and less by consumers. Maybe you can find it in health stores or in the pharmacy section of the supermarket. It is mainly found combined with other food ingredients; for example, soy protein shake powder is a mixture of soy protein isolate with flavors, minerals and vitamins.

Soy protein isolate downstream is wide; the major fields are meat products, dairy products, flour products, beverage, etc. In recent years, these industries have developed rapidly. Increasing demand for food ingredient is expected to drive the demand for the soy protein isolate market. As regions such as North America, China, Asia Pacific (Ex China) and Europe are food ingredient driven regions, the demand for soy protein isolates is high in these areas.

The industry is affected by the economy and policy, so it's important to put an eye to economy indexes and leaders' prefer. In addition, there are export tax rebate rate with 13% in China.
