PUNE, MAHARASHTRA, INDIA, March 14, 2019 /EINPresswire.com/ -- Summary

WiseGuyReports.com adds "[Life Insurance](#) Market 2019 Global Analysis, Growth, Trends and Opportunities Research Report Forecasting to 2024" reports to its database.

Life insurance is a contract between an insurance policy holder and an insurer or assurer, where the insurer promises to pay a designated beneficiary a sum of money (the benefit) in exchange for a premium, upon the death of an insured person (often the policy holder). Depending on the contract, other events such as terminal illness or critical illness can also trigger payment. The policy holder typically pays a premium, either regularly or as one lump sum. Other expenses, such as funeral expenses, can also be included in the benefits.

Term assurance provides life insurance coverage for a specified term. The policy does not accumulate cash value. Term insurance is significantly less expensive than an equivalent permanent policy but will become higher with age. Policy holders can save to provide for increased term premiums or decrease insurance needs (by paying off debts or saving to provide for survivor needs). Permanent life insurance is life insurance that covers the remaining lifetime of the insured. A permanent insurance policy accumulates a cash value up to its date of maturation. The owner can access the money in the cash value by withdrawing money, borrowing the cash value, or surrendering the policy and receiving the surrender value. In 2018, the global Life Insurance market size was xx million US\$ and it is expected to reach xx million US\$ by the end of 2025, with a CAGR of xx% during 2019-2025.
