Introduction

Global Lift Support Market

Most automotive applications now feature two, four or more gas charged lift supports and demand continues to grow. By 2000, that same application required six lift supports. When gas charged lift supports do begin to fail, it becomes difficult to open the vehicle's compartments. That can turn into a physical catastrophe if the lift fails to open or slams closed when in the open position...not to mention the strain of trying to lift a hatch or trunk that's completely lost all of its gas pressure power.

The global Lift Support market is valued at xx million US\$ in 2018 is expected to reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2019-2025.
