Along with the development of Chinese domestic KVM over IP, Chinese domestic KVM over IP has been mature and advanced, and the performance distance has been shortened compared with the imported KVM over IP.

As large demand of high-end products at domestic and abroad, many companies began to enter the field of high-end. Currently, the Chinese KVM over IP industry is not only beginning to transit to high-end KVM over IP products.

Although sales of KVM over IP brought a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and downstream support do not to enter into the KVM over IP field.
