

Contract Research Organization Market To 2021, Global, Regional, Country, Size, Growth, Opportunities, Players

LONDON, GREATER LONDON, UK, March 14, 2019 /EINPresswire.com/ -- The oncology drugs segment of the global [contract research organizations market](#) (CRO market) will put on an additional \$7 billion of sales by 2021, [The Business Research Company's Contract Research Organizations Global Market Opportunities and Strategies To 2021](#) has shown. The CRO market size as a whole will grow by \$25.7 billion between 2017 and 2021.

Organizations in the contract research industry offer solutions in conducting clinical trials for pharmaceutical, biotechnology and medical device companies. The core services offered by the contract research organization market include initial drug discovery solutions, toxicology studies, bio-analytical services, central laboratory, site monitoring, data management services, vigilance, bio-statistics, study and development program design and consulting, regulatory affairs and a variety of post-marketing surveillance services. Outsourcing such services can offer a competitive advantage for a company; it can be very cost-effective to pay a contractor compared with having in-house staff. This is especially true for small companies that do not have financial resources to build, equip and staff a research or analytical laboratory. A contract research organization offers the benefit of providing an existing laboratory facility and trained personnel ready to work on the project, thereby reducing the timeline for company milestones.

Contract Research Organizations Global Market Opportunities And Strategies To 2021 is one of a series of new reports from The Business Research Company that provides CRO market overviews, analyze and forecast market size and growth for the CRO market, CRO market segments, CRO market geographies, CRO industry trends, CRO industry drivers, CRO industry restraints, CRO drug discovery market leading competitors' revenues, profiles.
