PUNE, INDIA, March 14, 2019 /EINPresswire.com/ --

WiseGuyReports.Com Publish a New Market Research Report On –“ Beta Carotene Market 2019 Major Manufacturers Analysis And Industrial Applications Forecasts to 2026”.

[Beta Carotene Industry 2019](#)

Description:-

The global beta carotene market is anticipated to reach USD 618.94 million by 2026 and is anticipated to grow at a CAGR of 3.8 % from 2018 to 2026. Beta carotene market is expected to witness significant growth over the forecast period. Beta Carotene is widely used as antioxidants in cosmetics & personal care industry. In the cosmetics and personal care product manufacturing sector, it is used in development of novel formulations for aftershave lotions, cleansing products, bath products, suntan products, shampoo, makeup, skin care products, shampoos and hair conditioners.

Huge initial investment in technology innovation and R&D is expected to pose high entry barriers for new entrants in the market. New technology & product innovations such as OxC-beta livestock and Golden rice especially in developing and emerging countries are anticipated to support new players in the market. However, high initial investment cost will pose high entry barriers resulting in low threats to entry barriers.

A large number of beta-carotene raw material suppliers are spread evenly around the world, especially in North America and Europe. Less threat of backward integration results in the high bargaining power of the suppliers. A limited number of large & international players such as BASF and DSM, are present in the market, which follows a backward integration process.

The beta-carotene industry is fragmented market space. The industry has few international players currently operating and a large number of small-scale regional players. Leading regional and multinational companies are trying to increase their market share by investing in R&D activities and innovating new technologies. Many international companies are trying to merge or acquire the regional players to increase their market share, product portfolio, and regional presence. Industry rivalry is expected to be high over the forecast period.

The intra-industry threat is anticipated to be a major threat for beta-carotene market. Other carotenoids may impose a significant threat to the market. However, advantages of beta-carotene over these substitutes are expected to lower the threat of substitutes in future. The penetration of beta-carotene in the end-use industries is much higher than other carotenoids products.

Globally, the companies are focusing on developing new technologies to achieve product differentiation. The multinationals and leading regional players, are investing in research & development activities and trying to develop new and better product for the end-user industries. The companies are working to derive beta-carotene from genetically modified microorganisms. Golden rice and OxC-beta Livestock are believed to be the latest technology, which can drive the market.

Increasing demand of beta-carotene in end use industries, such as food & beverages, cosmetics, dietary supplements and animal feed is resulting in new product and technology development. In food and beverages, it is commonly used as coloring additives.

Major end-use industries for beta-carotene market are food & beverages, pharmaceutical & dietary supplements, personal care & cosmetics, and animal feed. Food & beverages applications was the largest end user application for beta-carotene market. Companies globally are investing in research and development activities for innovating new technologies and products. Multinational players including DSN N.V. and BASF are present in complete integration process of the product. These companies are also following JV's and merger & acquisitions strategies to increase their product portfolio and presence.
