Description

Wiseguyreports.Com Adds "Shortwave Infrared (SWIR) -Market Demand, Growth, Opportunities and Analysis Of Top Key Player Forecast To 2024" To Its Research Database

Shortwave infrared (SWIR) light is typically defined as light in the 0.9 – 1.7 μ m wavelength range, but can also be classified from 0.7 – 2.5 μ m. Since silicon sensors have an upper limit of approximately 1.0 μ m, SWIR imaging requires unique optical and electronic components capable of performing in the specific SWIR range. Shortwave infrared (SWIR) defines a specific wavelength range over which optical and electronic components are designed and coated. SWIR imaging offers a number of advantages compared to visible when used for inspection, sorting, surveillance, quality control, and host of other applications.

North America held the largest size of the SWIR market in 2017 and is expected to witness significant growth during the forecast period. Military and defense, industrial, and commercial are the major verticals that account for a significant share of the SWIR market in North America. Besides, this region is witnessing increasing demand for these cameras, especially cooled SWIR cameras, from the scientific research vertical.

The global Shortwave Infrared (SWIR) market is valued at 700 million US\$ in 2018 is expected to reach 1310 million US\$ by the end of 2025, growing at a CAGR of 8.1% during 2019-2025.
