Description

This report studies the Automotive Evp (Electric Vacuum Pump) market, Automotive Evp (Electric Vacuum Pump) is an ideal brake booster solution for both pneumatic brakes and hydraulic brakes.

The effect of vacuum boost in the braking system is related to the safety of the vehicle. In the automotive brake assist system, the vacuum booster can not get a vacuum or get a vacuum will lead the brake system is not so good. Electric vacuum pump can monitor the vacuum changes of the boosters by the vacuum sensor, and thus can provide sufficient power for the drivers in a variety of conditions.

Currently, almost all new energy and electric vehicles need Electric Vacuum Pump, and the size of the market for passenger cars grew rapidly, and passenger cars has a higher frequency parts replacement, so both in OEM and after-market, the Electric Vacuum Pump used in passenger cars has growth driving factor. So the demand has a stable growth rate. The China's sales of Electric Vacuum Pump in 2016 have been over 3932.6 K Units.

The technology of the Electric Vacuum Pump is difficult, and there are a few manufacturers can manufacture Evps. The big manufacturers can ensure high quality, so their product can meet the high-end consumer's demand.

The price is decreasing at a stable speed, and high quality means high price. Price between different manufactures has gradient.
