

IT Governance USA streamlines ISO 27001 risk assessments with vsRisk Cloud

New Cloud-based tool enables organizations to deliver fast, accurate, and hassle-free ISO 27001 information security risk assessments

NEW YORK, NEW YORK, UNITED STATES, March 18, 2019 /EINPresswire.com/ -- [IT Governance USA](#) is pleased to announce that its sister company, Vigilant Software, is now offering a Cloud-based solution for conducting information security risk assessments aligned with ISO 27001. [vsRisk Cloud](#) is an information security risk assessment tool that makes it easier for multiple users in an organization to collaborate and deliver accurate and hassle-free risk assessments, saving time and providing fully ISO 27001-compliant and auditable results. Created by industry-leading ISO 27001 experts, vsRisk Cloud eliminates the need to use spreadsheets, which are time

consuming, prone to user input errors, and can be difficult to set up and maintain. It enables organizations to produce fast, robust, reliable, and easily repeatable annual risk assessments. A streamlined version of the desktop product [vsRisk™](#), vsRisk Cloud allows users to work from anywhere provided they have an Internet connection and a compatible browser. Key features and benefits include:

- Easter risk assessment: Cuts the time to produce an ISO 27001 risk assessment by as much as 80% compared to using spreadsheets
- Easy-to-use interface: A Cloud-based software tool with an intuitive interface that can be accessed by multiple users in an organization enhancing collaboration
- Simplified risk assessment: Dependably delivers each of the five key steps to a successful risk assessment: establish a risk assessment framework, identify risks, analyze risks, evaluate risks, and select risk management option
- Walkthrough tutorials: The risk assessment wizard walks users through each step of identifying, evaluating, and responding to an asset-based risk to provide consistent, valid, and comparable results
- Identifying risks: Identify risks by selecting assets, threats, and vulnerabilities, and applying controls to reduce the risk to an acceptable level
- Enhanced reporting: Generates two audit-ready reports to meet ISO 27001's reporting requirements: the SoA (Statement of Applicability) and a risk treatment plan

Alan Calder, founder and executive chairman of IT Governance USA, said: "Experienced information security and risk management practitioners know that a manual risk assessment is highly dependent on one or two individuals. It is time-consuming and costly to create, and often suffers from data and process inconsistencies that undermine the integrity of the results. vsRisk Cloud streamlines and speeds up the risk assessment process, saving users time and money, with the added benefit of the Cloud making the solution more accessible."

vsRisk Cloud is dynamic and updated frequently. As part of their 12-month subscription, users receive the latest updates and continued support, giving optimal software performance. For more information, visit [IT Governance USA](#).

IT Governance USA is the single-source provider of books, tools, training, and consultancy for IT governance, risk management, and compliance. It is a leading authority on data security and IT governance for business and the public sector. IT Governance is 'non-geek', approaching IT issues from a non-technology background, and talking to management in its own language. Its customer base spans Europe, the Americas, the Middle East, and Asia. More information is available at www.itgovernanceusa.com. □
