

Make Moms Happy?

*What makes a mommy happy?
Kids? Beauty? Health? Sweet Treats?
All of the above!
Find out how a three roll mill does it for
moms*

SAN DIEGO, CA, UNITED STATES, March 18, 2019 /EINPresswire.com/ --

Baby Diaper Rash Cream

A mommy can give her child fast relief from diaper rash by applying various ointments and creams to the affected area. There are a few active ingredients that are known to work best at healing and protecting. Zinc oxide, for example, is usually present in creams in concentrations of 10 to 40 percent. Running all the ingredients through our three roll mill helps produce a homogeneous mixture.

Baby Sun Screen

“

All that I am, or hope to be, I owe to my angel mother.”
Abraham Lincoln

Mineral-based sunscreens are best for babies. Zinc oxide is the primary active ingredient. It stays on top of a baby's skin to physically block rays. A three roll mill disperses zinc oxide evenly in the cream to achieve a smooth texture to apply on a baby.

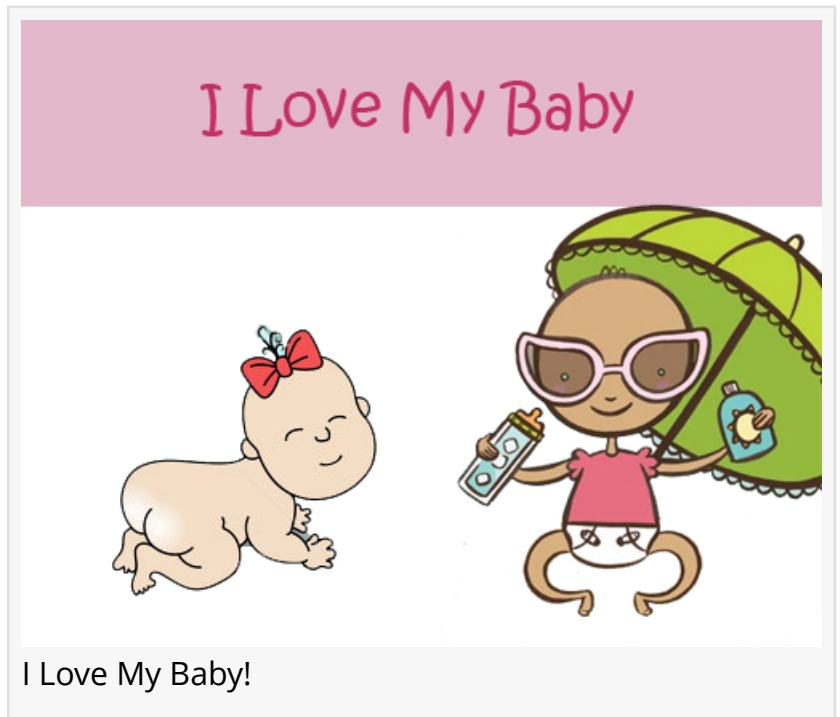

Anti-Aging Creams

Beside all the anti-aging products moms can buy from the beauty counters, there are compounded anti-aging creams that are prescribed by a doctor. Many of our pharmacy customers bought ointment mills to make such creams! The active ingredients can be many things such as glycolic acid, tretinoin, arginine, ascorbic acid, hyaluronic acid, lactic acid, nicotinamide, retinol and tocopherol.

Makeup

I bet when moms have time for themselves, they love to be pampered and enjoy a make over. Cosmetics with either rich or natural colors are moms' friends. A three roll mill helps disperse agglomerated pigment particles into a moisturizing base. That's how the best makeup products are made.

Hormone Replacement Therapy

Hormones affect many areas of a woman's health. Although sometimes controversial, compounded hormone replacement therapy (HRT) has been practiced to restore balance and help a woman feel like herself again. HRT is most often prescribed to ease the symptoms of menopause, but it also can be used to treat a variety of conditions such as Pre-menstrual syndrome (PMS), irregular menstrual cycle, moodiness, infertility, post-partum depression, weight gain, endometriosis, fibrocystic breasts, sleep disturbances, and night sweats.

Chocolates and Chocolate Nut Pastes

Chocolate and its varied forms are probably moms' favorite confection. Do you know what makes a chocolate product stand out? The particle size has to be reduced to around 25 microns. That's when you can feel all the difference in its smoothness. A three roll mill is the ultimate refining tool. It has been recorded that three roll mill was used to mill chocolate as early as 1915. Best chocolates for the best moms!
