Despite the presence of competition problems, due to the clear global recovery trend, investors are still optimistic about this area, in future still more new investment will enter into the field. Technology and cost are two major problems.

Growth in switchgears will also be sustained by government directives to replace older redundant systems to achieve operational safety, and security in industrial establishments.

The worldwide market for Medium Voltage Switchgears is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2024, from xx million US\$ in 2019, according to a new GIR (Global Info Research) study.
