

Biologics Market, Global, Segment, Region, Country, Size, Growth, Forecasts, Trends

LONDON, GREATER LONDON, UK, March 20, 2019 /EINPresswire.com/ -- The growth rate in the global [biologics market](#) has accelerated recently and is now almost 10% year on year. By 2022 the biologics market which is part of the pharmaceutical market will be worth \$350 billion. 52% of the top 100 pharma products' sales value will then come from biologics, as established chemical pharmaceuticals drop off the patent cliff and new breakthrough biologics are approved.

All three of the market's major segments, monoclonal antibodies, therapeutic proteins and the [vaccines market](#), are growing at close to the overall market rate.

Metabolic disorders are the largest therapeutic treatment area for the global biologics market, followed by cancer, cardiovascular diseases and immunological diseases. North America is the largest regional market for these drugs and also the fastest-growing, though Asia Pacific is growing almost as fast.
