

10 Key Reasons to attend SMI's 2nd Annual Pharmaceutical Microbiology East Coast

In just 3 weeks, the highly anticipated Pharmaceutical Microbiology East Coast conference and exhibition will take place in Boston, USA, on April 10 & 11, 2019.

BOSTON, MA, UNITED STATES, March 20, 2019 /EINPresswire.com/ -- SMI Group are delighted to share 10 key reasons to why you should attend the this event in Boston, next month.

This year's agenda features a series of presentations from industry experts to discuss the key topics in the [pharmaceutical microbiology](#) industry such as risk management and preparing risk-based programs. Attendees will also learn about key trends and answer questions around environmental monitoring and critical utility.

A highlight of the 2019 event will be to explore the latest in regulatory changes and evaluating strategies to ensure compliance e.g. [revision of the Annex 1](#), disinfectant validation and methods, [endotoxin detection methods](#) and microbiological methods.

This highly anticipated meeting will be chaired by James Drinkwater, Chairman, PHSS, Head of Aseptic, Processing Technologies & GMP Compliance at Franz Ziel GmbH. In an exclusive interview with James Drinkwater to discuss the upcoming conference and his role, James responds:

"I currently hold the position of Chairman for the Pharmaceutical and Healthcare Sciences Society (PHSS) and lead the PHSS Annex 1 focus group from which 100 pages of comments were provided to the EMA during the revision consultation process. Also as part of the UK delegation from UCL: University College London, to provide Jordanian and Saudi Arabia FDA inspectors training on Quality assurance sterile product manufacturing including environmental control and monitoring for aseptic processing, I am aware of current challenges and knowledge gaps for both the industry in regulators. I believe that SMI's Pharmaceutical Microbiology series highlights key areas of industry changes, and provides a useful platform for networking, idea and knowledge sharing, and collaboration."

For the full program and speaker line-up, visit the website to download the brochure at <http://www.microbiologyeastcoast.com/pr4>

There are also two focused pre-conference workshops that will take place on Friday April 12th, 2019 at the same venue, The Battery Wharf Hotel.

- Workshop A is on 'Mold Contamination Challenges' led by Ziva Abraham, CEO, Microrite
- Workshop B is on 'Microbiological control of GMP using Vapour Phase Hydrogen Peroxide bio-decontamination' led by James Drinkwater, Chairman, PHSS, Head of Aseptic Processing Technologies & GMP Compliance, Franz Ziel GmbH

PHARMACEUTICAL MICROBIOLOGY EAST COAST 2019
APRIL 10TH-11TH | BOSTON, USA

I WILL BE CHAIRING AT THE EVENT AND SPEAKING ON:
ENVIRONMENTAL MONITORING IN BARRIER SEPARATION
TECHNOLOGY: ISOLATORS AND RABS

James Drinkwater
Chairman, Pharmaceutical and Healthcare Sciences Society
