About Manhattan Edit Workshop's Six Week Intensive Workshop: The post-production industry is highly competitive, and knowing the industry standards – Premiere Pro, After Effects and Avid Media Composer – is critical for success. MEWShop offers in one comprehensive, six-week course all of these editing applications, taught by certified instructors. No other program guarantees more time in the classroom or more working on one's own computer. The Six Week Intensive Course will take students through each program as they work on various real-world projects to illustrate the distinct strengths and nuances of each NLE software. MEWShop's Six Week Intensive is the only course of its kind that allows students to choose the footage they want to edit on the platform they prefer. This program also is the only Six Week program where students can have the opportunity to become a Certified Avid User, through certified training and exams.

Beyond the creative and technical aspects of editing, a portion of the Six Week Intensive Workshop is focused on the best strategies to secure a job once the class ends. Students will draft cover letters and resumes, which will be refined over the span of the class, and also discuss with instructors interview strategies and job applications, as well as how to appropriately set rates and find the right work for each graduate's unique interests.

MEWShop also continues its successful intern/entry level referral program, where we connect students to top post houses and companies in the New York area. Upon completion of the Six Week Intensive Workshop, students will be provided with links to MEWShop's industry contacts in order to apply to paid editorial internships and entry-level positions – via resumes and work samples – where students will be given the opportunity to utilize their training and pursue a career in post-production.\*

\*Manhattan Edit Workshop cannot guarantee students will be hired or granted an interview as a result of the Six Week Intensive Workshop. \*\*Artists in Residence are schedule permitting.
