

PREDICTIVE ANALYTICS APPLIED TO ENHANCE SCHOOL SAFETY

Introducing The Safe Campus – A solution preventing school violence, enhancing safety, and addressing emergency need

FAYETTEVILLE, NC, UNITED STATES, March 21, 2019 /EINPresswire.com/ -- Fayetteville, NC March 21, 2019 – [Blue Light LLC \(www.BlueLightLLC.com\)](http://www.BlueLightLLC.com) is thrilled to introduce their latest product in predictive analytics application.

[The Safe Campus](http://www.TheSafeCampus.com)

www.TheSafeCampus.com is a solution developed to enhance and address the continuing and unfortunate issue of safety in American schools and Universities.

The platform, based on proven technologies, analytical techniques, and emergency response procedures, allows any educational facility to create a Campus Security Operations Center (CSOC) equipped with the tools and immediate response capabilities to rapidly identify potential offenders and to react to emergency situations of all types. Existing databases used on campuses are leveraged to allow for quick access to valuable information.

The Safe Campus was developed to be a turn-key, out-of-the-box, rapidly installed, easily deployed and trainable, affordable solution to ensure a rapid response and support decision making.

Rapidly responding to an incident is possible through The Safe Campus by analyzing vast amounts of in-house, external data, public data feeds and streams providing critical information necessary to respond to an emergency situation. Clients can adapt the solution to their specific needs, taking into account existing technology already in use.

To learn more about The Safe Campus, or to request a demo, please contact Ed Boggess at 919-436-4172 or via email at edwin.boggess@bluelightllc.com

Blue Light is a strategic IBM® Silver Business Partner specializing in information analysis and data analytics, with over a decade of experience around the world.
