## Report Details:

This report provides in depth study of “Organic Wine Market” using SWOT analysis i.e. Strength, Weakness, Opportunities and Threat to the organization. The Organic Wine Market report also provides an in-depth survey of key players in the market which is based on the various objectives of an organization such as profiling, the product outline, the quantity of production, required raw material, and the financial health of the organization.

Organic wine is produced from grapes that are grown organically. Organic cultivation excludes the use of artificial fertilizers, pesticides, fungicides, and herbicides. There are more than 2,000 organic wine producers globally. Since organic grape cultivation does not make use of any harmful chemicals, it is beneficial for both the environment and the crop. Grapes constitute one of those agricultural products that receive the heaviest application of pesticides, and conventional wines produced from such grapes generally contain pesticide residues. However, since organic wine is prepared from organic grapes, it is free from pesticide residues. One of the latest trends that will gain traction in the global organic wine market is the emergence of new packaging strategies. Innovative packaging will help attract the consumers and also assist in increasing the shelf life of the product. An attractive packaging offers better visibility for the product among the consumers and also raises the customers' interest in the product.

The global Organic Wine market is valued at xx million US\$ in 2018 is expected to reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2019-2025.
