Motorcycle connected helmet is a device that provides the rider with information on traffic, rear view, and infotainment along with the attributes of safety and connectivity while riding. This helmet also enables communication with other riders.

With the surging demand for motorcycles, the fatality rate among motorcyclists remains a cause for concern. The fatality risk from motorcycles has created the need for safety, eventually paving the way for helmet adoption and advanced safety features integrated into these helmets.

Advanced helmets having 180-degree rear view will be beneficial for the rider and will display vehicles in another lane. Additionally, motorcycle connected helmets allow the rider to reduce distraction due to external factors such as vehicles in their blind spot. As a result, the connected helmet offers increased riding comfort along with increased safety quotient.
