

EdbMails Announces New Release Update for Office 365 tenants Migration

INDIA, March 25, 2019

/EINPresswire.com/ -- EdbMails, today announced the release of new version for [Office 365 Migration](#) to support all types of MIME compatible items.

Due to invalid MIME content issue, the migration may fail to perform a complete and an accurate migration because these items are rejected by the Office 365 during migration. This error message indicates the item was skipped and not migrated. In most cases, you will find that the item is not readable from the Source mailbox.

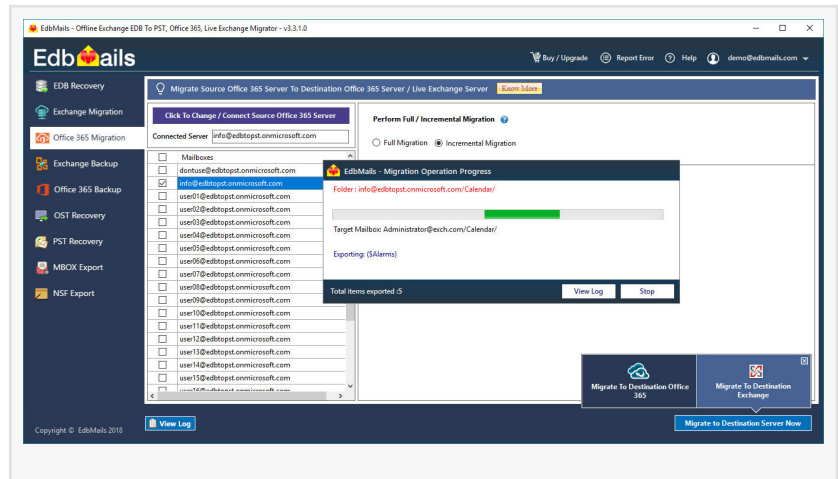

EdbMails new version will handle this issue without any manual intervention. Wherein most of the competitor and other applications recommends you to consider manually forwarding any affected items to the destination or consider exporting and importing affected items using Outlook. This is rather impossible especially when you have millions of records from hundreds of mailboxes.

EdbMails, a global leader in Exchange Recovery and Migration, Office 365 consultation and migration has lately seen its popularity go up across the enterprise world. Its appeal is largely due to the fact that it makes migration, an otherwise difficult task, doable in a timely and cost-effective fashion. Fast migrations are made possible even in the event that you have fewer resources. Migrating to Office 365 is becoming increasingly more popular among businesses, both big and small. First you must figure out how much of data is to be migrated, what's the type of information that must be migrated and finally how much time can be spent on office 365 migration. Whatever the migration goals that you set, EdbMails can handle it well.

EdbMails easy-to-use migration for Office 365. Move your mailboxes from Exchange Server 2007, 2010, 2013, 2016 and 2019 to Office 365.
