

U.S. Pharmaceuticals Market to be worth USD 685.45 billion by 2023, Reveals New Navadhi Market Research Report

Navadhi Market Research has published "U.S. Pharmaceuticals Industry Analysis and Trends 2023" Report which provides forecast for USA Pharma Market up to 2023.

LEWES, DELAWARE, UNITED STATES, March 27, 2019 /EINPresswire.com/ -- U.S. (United States) pharmaceutical market is the largest pharmaceuticals market in the world and accounted for more than 40% global pharmaceuticals sales in 2017. USA pharmaceuticals market is expected to grow in the upcoming years despite recent slowdown due to price erosion in U.S. generics pharmaceuticals market, delay in approval of complex generics by US FDA (United States Food and Drug Administration) and Government's talks of drug price control mechanism like other major pharmaceutical markets. The reasons are simple: aging and growing population, rising income levels, and emerging medical conditions and emergence of new diseases.

U.S. Pharmaceuticals Industry Analysis and Trends 2023

As per [NAVADHI Market Research](#), the U.S. pharmaceutical industry will be worth USD 685.45 billion by 2023. The growth in this market is predicted on the basis of various factors like market drivers, current and upcoming trends, current growth pattern, and market challenges.

Ambarish Kumar Verma, Managing Director of NAVADHI Market Research Private Limited said "U.S. is expected to retain its leading position in the global pharmaceuticals market with market share of 43.72% in 2023 improving on its market share compared to 2017. This growth is fuelled by the growing and ageing population in U.S. pharmaceuticals market. More than 15% of U.S. population is above 65 years of age and this number is expected to rise by 2023. Apart from ageing and rising population the improvements in purchasing power and access to quality

healthcare and pharmaceuticals to poor and middle-class families worldwide also is driving the growth of U.S. pharma industry. The income level of average American is expected to rise by 3.21% CAGR by 2023, due to rising employment levels and stable economic conditions.”
