WiseGuyReports.com Presents "Global Enterprise Social Networking (ESN) Market Size, Status and Forecast 2018-2025" New Document to its Studies Database. The Report Contains 104 Pages With Detailed Analysis.

Description

This report focuses on the global Enterprise Social Networking (ESN) status, future forecast, growth opportunity, key market and key players. The study objectives are to present the Enterprise Social Networking (ESN) development in United States, Europe and China.

Enterprise social networking focuses on the use of online social networks or social relations among people who share business interests and/or activities. Enterprise social networking is often a facility of enterprise social software (regarded as a primary component of Enterprise 2.0), which is essentially social software used in "enterprise" (business/commercial) contexts. It encompasses modifications to corporate intranets (referred to as social intranets) and other classic software platforms used by large companies to organize their communication, collaboration and other aspects of their intranets. Enterprise social networking is also generally thought to include the use of a standard external social networking service to generate visibility for an enterprise.
