

North American Market, Largest In The Global Telemedicine Technologies Market

The North American market accounted for the largest share of the telemedicine technology market in 2016, at nearly 55% of the total.

LONDON, GREATER LONDON, UK, April 4, 2019 /EINPresswire.com/ -- The global market for telemedicine technologies based on the geography is segmented into four regions, which include North America, Europe, Asia-

Pacific and Rest of the World (RoW). RoW comprises South America, Africa, and the Middle East. The North American market accounted for the largest share of the telemedicine technology market in 2016, at nearly 55% of the total. It was followed by Europe and Asia-Pacific regions, which accounted for around 23% and almost 17% respectively, of the overall telemedicine technologies market in 2015.

Most companies operating in the [telehealth services market](#) are headquartered in the United States, where a rising number of patients are suffering from chronic diseases due to the rapidly growing aging populations. Shortage of healthcare professionals, growing requirement of healthcare facilities in remote areas, changing life style habits of the population and lack of proper disease management are expected to increase the demand for remote patient monitoring. This will boost the telehealth service market for telemedicine applications.

Telemedicine Technologies Global Opportunities And Strategies To 2022 from [The Business Research Company](#) is one of a new series of industry report that provides telehealth services market overview, analysis and forecasts of telehealth services market size and telehealth services industry statistics, telehealth services market growth rates, telehospitals market share and telehealth services industry's company profiles of the leading competitors. The telehealth services market report describes actionable strategies for participants in the telehealth services industry and also identifies the most significant opportunities in the market.

Where To Learn More

Read [Global Telemedicine Technologies Opportunities And Strategies To 2022](#) from The Business Research Company for information on the following:

Markets Covered: Global telemedicine market, By Type of Service Area – (tele-home, tele-hospital), by Application – (tele-radiology, tele-consultation, tele-monitoring, tele-surgery and other)

Data Segmentations: Telemedicine technologies market size, global and by country, historic market size, by value and by volume; forecast market size, by value; growth rates for the world, 7 regions and 12 countries; telemedicine technologies market segments – By Type of Service Area – (tele-home, tele-hospital), by Application – (tele-radiology, tele-consultation, tele-monitoring, tele-surgery and other) market size, historic and forecast size, and growth rates for the world, 7 regions and 12 countries.
