

# Asia-Pacific The Largest Region In The Global Construction Market By The Business Research Company

*The Business Research Company offers Construction Market Global Opportunities and Strategies to 2021 to its research repository.*

LONDON, GREATER LONDON, UNITED KINGDOM, April 12, 2019 /EINPresswire.com/ -- Asia-Pacific was the largest region in the global [construction market](#), with almost 60% of the market. This was mainly due to the presence of a large number of construction companies serving a large customer base in countries such as China and India, and high government spending on infrastructure projects such as roads, railways and residential buildings in the region. Asia-Pacific's construction market grew from almost \$7 trillion in 2013 to above \$10 trillion in 2017 at an annual rate of nearly 8%.

Asia-Pacific's construction market is expected to grow from above \$10 trillion in 2017 to about \$14 trillion in 2021 at an annual rate of almost 10%. This high growth in the construction market can be attributed to the development of infrastructure in emerging markets such as Vietnam, Philippines and Indonesia. In India and China, large-scale investments on construction of airports and runways will boost the market growth.

The construction industry includes architectural services, the physical processes of building, infrastructure development, civil engineering, the assembly and installation of prefabricated components and equipment, and repairs and maintenance for already built structures.
